Speaker, volunteer and organizer of tech events (Hacktoberfest hubs, etc.)

C#, Angular and .NET Tags moderator on DEV.to

LANGUAGES

French Native

English B2 (TOEIC: 930)

PROJECTS

ngx-flagr

ngx-flagr is an Angular library that simplifies feature flag management by providing a set of classes that can be used to efficiently manage feature flags. (<https://github.com/pBouillon/ngx-flagr>)

MqttTopicBuilder

With almost 8K downloads, this C# library aims to provide a robust way for developers to handle MQTT topics in an OOP way instead of raw values. (<https://github.com/pBouillon/MqttTopicBuilder>)

"This Is" project

Member of the "This is" project and active contributor on "This Is Angular" (<https://dev.to/this-is-angular>). The project is about sharing knowledge without restriction and empowering others.
